Patient relationships, not records.

For over 18 years, healthcare and life science companies of all sizes and types — provider, payer, health system, pharmaceutical, and medical device companies — have relied on Salesforce to help drive productivity and increase revenue. Now, with Health Cloud, organizations can also take patient relationships to the next level.

Health Cloud not only unlocks data from legacy systems of record and EHRs, it gives healthcare professionals the tools they need to collaborate more efficiently, understand patients more deeply, and build 1-to-1 relationships across entire care journeys.

Here are just some of the ways Health Cloud can help build deeper patient relationships:

- **Smarter Patient Management**
  With our smarter management tools, care teams and providers can easily focus on the patients and tasks that need the most attention.

- **Personalized End-to-End Experience**
  Create a secure patient community with drag-and-drop ease and connect the entire care team on any device.

- **Complete Patient View**
  Quickly access patient profiles, care team networks, care plans, and health timelines, including clinical data and patient interactions.

- **Care Plan Tasks**
  Personalize care plans with tasks and reminders tailored to each patient’s needs and preferences.

- **Patient Care Network**
  Foster collaboration and communication among care team members to improve patient outcomes.

- **Health Cloud Today Page**
  Centralized dashboard for real-time updates and quick access to critical information.
TAKE A CLOSER LOOK AT THE FUTURE OF PATIENT RELATIONSHIPS

Salesforce Health Cloud Feature Set

**Salesforce Shield**
In addition to Health Cloud, Salesforce Shield addresses today’s complicated compliance and governance requirements by offering an extra layer of visibility and control that ensures sensitive PHI data is handled securely.

**Salesforce Health Cloud**
With Health Cloud, customers have a data model built around patients and designed specifically for a clinical setting using FHIR standards. This out-of-the-box functionality reduces customization as well as guesswork, and benefits from Salesforce’s continuous innovation with three seamless upgrades each year.

**Salesforce Service Cloud**
Service Cloud is the world’s #1 service and support application. Health Cloud leverages its powerful features to enable more personalized patient relationships.

### Field Audit Trail
