

FIELD OPS APPS:

MOBILE APP IDEAS TO
KEEP BUSINESS MOVING

MOBILE APPS YOU COULD BUILD TO HELP FIELD OPS RUN FASTER

Logistics App

End the need for paper and connect delivery drivers to each other and headquarters with a mobile app that tracks deliveries for sales, service, and operations.

Service App

Empower your entire organization to collaborate and swarm every case, from anywhere.

Case Management App

Enable your ecosystem to coordinate the delivery of services and care around your customers' needs.

Field Ops App

Get customers up and running faster with accurate arrival windows, work orders in one place, and the ability to troubleshoot on the fly.

Order Fulfillment App

Take, manage, and fulfill orders in real time with dashboards and alerts on every device.

Troubleshooting App

Give service reps what they need to solve technical issues and assign support techs with the click of a button.

SPOTLIGHT APP: ADP

ADP built an entire suite of mobile-optimized apps—from order management to itinerary planners—on Salesforce App Cloud. Now employees in the field do more, including getting contracts signed on the spot.

ACCORDING TO IDC,* SALESFORCE APP CLOUD DELIVERS:

50% Faster app development lifecycle

44% More new applications delivered

478% ROI
